MATV installation with plats IF tap-offs

Only the terrestrial TV band is distributed, even though TV-SAT tap-offs and splitters are used. Tap-offs with different attenuations are used to compensate the levels at the different outlets. In buildings with fewer floors, the indicated tap-offs are used on the lower floors, and the necessary head-end level will be that which is indicated on the input of the tap-off. The levels are indicated on the weakest outlets.
